

DAILY ENVIRONMENT REPORT™

Breaking coverage of the day's top environmental news.

Learn how the United States and key players around the world are responding to the environmental challenges of our times.

Format & Frequency

Updated daily online, with e-mail highlights.

COVERAGE

- Original reporting on breaking news from Bloomberg BNA's network of national and international correspondents
- Full coverage of today's environmental topics and legal requirements, with balanced news articles, insightful analysis, current statistics, and reprints of key official documents
- Objective reporting on legislative and regulatory developments, court and administrative decisions, compliance news, government policies, and international standards

BENEFITS

- Offer reliable guidance to your clients or organization based on the latest news.
- Stay ahead of the curve as you monitor laws, policies, trends, and practices that could affect you and those you advise.
- Be a more effective participant in the legislative and regulatory process and give your company time to prepare for new statutes and regulations.
- Make sound business decisions concerning compliance and enforcement in light of newly decided state or federal cases.
- Anticipate risks caused by climate change or by emerging regulations to mitigate climate change.
- Use quick-scan highlights and e-mail summaries to find the information you need with ease.

SPECIAL FEATURES

- *BNA Insights* from leading experts give you cutting-edge perspectives on new and emerging issues.
- Bloomberg BNA's comprehensive coverage of legal decisions provides you with immediate knowledge of the environmental law developments that can significantly affect your business or clients.
- Bloomberg BNA publications are always meticulously cited to previous stories, allowing our readers to track the development of an issue over time.
- Comment deadlines for major regulations and other actions.
- Weekly videos highlight important upcoming events and discuss top news stories before they break.
