Global Applicability & Audit

Everything you need to conduct EHS audits and site assessments on an international scale.
Global Applicability & Audit

Your timesaving solution for maintaining effective international compliance.

Virtually every multinational company needs to audit its foreign operations for compliance with local EHS requirements. Global Applicability & Audit helps you understand a country’s EHS compliance obligations, how those obligations are enforced, and what agencies have regulatory authority. We make it easy to identify areas that are out of compliance and weigh the level of risk. Dual-language scorecards (available for multiple jurisdictions) let English and non-English speakers work side by side from the same document.

With Global Applicability & Audit, you can:
• Use guide notes to understand a requirement or answer a compliance question.
• Customize your audit by selecting only those topics that apply to your facility.
• Generate audit and compliance scoresheets.
• Assess a facility’s compliance with applicable regulations.
• Rely on detailed instructions, auditor guide notes, field-tested checklists, and accurate quarterly updates.
• Link directly to the text of any relevant citations.
• Save, share, and export your EHS audit checklists.
• Streamline your international operations as you save time and money.
• Receive two complimentary hours of consulting from Enhesa.
• Utilize dual-language checklists in English and the country’s official language (available for multiple jurisdictions).

We speak your language — dual language is available for multiple jurisdictions.

A sophisticated yet simple approach to auditing.

Choose a jurisdiction and topic.
This is the first step toward creating a custom audit checklist targeted to your operations.

Determine what topics apply to your facility with our applicability analysis.
Quickly answer questions about your operations to determine which requirements apply to your facility.

Review and update your audits.
Continue to fine-tune or update your audits as conditions or findings change.

Global Applicability & Audit is an ideal solution for:

Multinational companies with corporate self-assessment/compliance management programs
Help your company’s international sites meet their internal self-assessment mandates on an ongoing basis.

Sites doing their own compliance analyses
Use Global Applicability & Audit as part of the ISO EMS process to identify all “legal aspects,” especially at larger, more complex industrial sites.

Internal audit groups
Global Applicability & Audit saves you money—compare with the cost of updating audit checklists yourself.

Independent professional auditors/consultants
Compete with industry leaders—you have access to the knowledge and field-tested materials of an international network of EHS auditors.
Determine applicability.
Read guide notes for audit strategy and tips.

Create reports and scoresheets.
Easily export your results to Excel for inclusion in documents and presentations.

Manage change.
Check for updates since you last saved your audit.

Components
Pre-Audit/Pre-Assessment Preparation
- List of all documents, reports, and files to be gathered for review prior to on-site audit or inspection

Compliance Rulebooks (Audit Protocols)
- Detailed summaries of regulatory requirements
- Guide notes:
  - How to determine applicability
  - Look for specific compliance elements
  - Practices, conditions, and situations that could indicate potential problems

Scorecards
- Allow quick recording of the facility's compliance status with each regulatory requirement

Regular Updates
- Changes are flagged for topics in saved templates

Start your free trial today.

Customize your audits and focus on the specifics of your facilities.

Global Applicability & Audit allows you the flexibility to select just those modules that apply to your facility and add corporate standards or site-specific requirements to fully flesh out your checklist.

Control the level of detail you apply to your compliance audit checklist.

Global Applicability & Audit is concise and streamlined yet still allows you the option of drilling down for more detail when the complexities of a situation demand it.

Trusted expertise from two industry leaders.

Global Applicability & Audit brings together the expertise of two industry leaders: Bloomberg Environment, a leading publisher of EHS news and analysis for more than 40 years, and Enhesa, a recognized leader in international audit consulting and regulatory compliance.
