Environment & Energy Report

Bloomberg Environment is the recognized authority on critical information regarding environment and energy. Discover unmatched expertise with Environment & Energy Report.

Key features include

• **Original reporting** on breaking news, special reports, and latest developments from Bloomberg Environment’s network of national and international correspondents.

• **Practitioner insights** provide in-depth analysis from leading experts, who give our readers cutting-edge perspectives on new and emerging issues.

• **Access to cited primary source documents** (court opinions, reports, federal register documents, legislation, agency documents, and more).

• **Key interviews** with policy makers, government officials, and industry experts.

• Bloomberg Environment’s annual **Environment & Energy Outlooks** explore potential legislative, judicial, and regulatory developments surrounding climate change, air pollution, water, chemicals, waste, and energy. Special reports incorporate insights from our editors and reporters as they examine how the changing political landscape may shape action by the Environmental Protection Agency and Department of Energy as well as international environmental and energy policy in the coming year.

• **Customizable emails** to receive news in your inbox at the frequency that works for you.

• **Tailored alerts** to receive news on developing stories based on your selected topics and locations.

• **Podcast series** highlighting environmental and energy policy discussion with reporters, thought leaders, and policy makers.
